COOLEMAN RIDGE PARK CARE GROUP

Newsletter January 2016

Previous meeting (cancelled) Sunday 20 th December Cooleman Trig

As readers will probably recall, Sunday 20 December was a total fire ban day hence all Park Care activity was cancelledowever, Linda, Graham and Rob had not heard the news and were on site fairly early to beat what was expected to be a real stinkand it was. Doug turned up a little while later to inform them of the day's fire status and so they easetheir way back down the hill weeding verbascurand fleabanes they went. The target of the day, Euphorbia depauperapa, survived to fight another day but hopefully will be more vulnerable during the autumn flush.

Anyway, all was not lost as Graham took the opportunity to explain is new method of poisoning verbascuminstead of cutting it off right near the ground, heats off the seed head and dathe remaining stalk with glyphosate. No need to bend owned strain your backand so much quicker when there are lots of the weed arod.

Also, Lindadiscovered Digitaria brownii/Cotton panic grass This is avariable species with a wide distribution all over Australia, from wet sclerophyll forests to semi-arid shrub woodlands to hunorck grasslands, but rarely seen around the ACT

Centenary Trail Book Offer

On his way down from Cooleman Trig recently, Rob sawa book chained to the

Next Meeting

Sunday 17 th January Group Area North Above Chauvel Circle

In the event of a total fire **b**aall activities will be cancelled.

railings of the bridge at the bottom of the track It was the newly published Walking and Cycling Canberra's Centenary Trailind it was being offered for sale at \$30 a copy

Always on the lookout for new walking books, he contacted e distributor, Bill Caddey(ph: 040637614)3 The book contains well set out walking directions and maps of each section of the Centenary Trail, along with descriptions and photos what may be seen in the area. Upon hearing about the Group, and with a whole room full of copies to distribute Bill offered to sell it to any CRPCG member of just \$15 (half price). So, if you would like a copy or copiesend a request to Rob at lundier@iinet.net.ale will act as agent for the Group as this will make the process more efficient and easier for Bill. Rob will then collect the booksnd arrange toget them to youPayment can be made upon delivrey. Rob Lundie

What is hopefully NOT around— Mexican feather grass	
Photo: TAMS	The Mexican feather grass plant is a densely tufted perennial grast produces a lot of seeds and scan spread rapidly and smother native plantslt can be mistaken for the less detrimental serrated tussock grass and unfortunately has been sold in Canberra as Angel Hair Grass, Angel Hair and Pony tails. There was a recent sighting in the suburb of Fraser. If you see it on or near The Ridge contact TAMSor Access Canberra. We have enough weeds to worry about! Source: ABC New \$17/12/2015
where do all the leaves go? In a fascinating article by entomologist Ted Edwards AO Where do allthe leaves go?', Fronds, no. 81, Dec2015, pp. 10–11), he discusses the role of specialist moth larvae in oreaking down leaves. Through this process the surface litterso important to soil health and to diversity of plants and animals oreated The mallee moths are particularly important in this regard in our local dry plant communities. Ted is especialtoncerned that over-frequent burning wipes out all the oreatures that break down leaf litter. He points to the unintended consequences of such a oractice: the huge loss of nutrients, the selection for rapidgrowing weeds, and the extinction of some plants and animals. Arminel Ryan	ordinance were Bathurst Burr, Star, Saffron, Chinese Thistle and 'Stinkwortlr(ula graveolen). There was a fine of £20 if landholders failed to control these weeds Jenny Horsfield What's been seen at the Old Dam Wood duck and ducklings(Pat Ryan, Nov. 2015)
Looking back: Noxious weeds in the Federal Territory Our ongoing battle with invasive weeds insot new: the early Territogradministrators were very conscious of the degraded state of the and they were responsible for. A Noxious Weeds Ordinance was put into operation in 1924, giving government officers the right to enter land where weeds were out of control or
